Message from Chairman

Dear Colleagues,

As you know the Accounting Standards Board (ASB or the Board) Nepal was formed by the Government of Nepal on July 08, 2002 (2059 Ashad 24) with an amendment to the Nepal Chartered Accountants Act, 1997 (first amendment, 2002) incorporating the provision for its establishment and operation. The ASB Nepal has been formed with the responsibility to formulate accounting standards for the preparation and presentation of financial statements in Nepal. The ASB Nepal is primarily responsible for setting accounting standards for business enterprises in line with the International Financial Reporting Standards (IFRSs).

Accounting Standards are the set of basic principles and procedures covering various aspects of accounting transactions for their recognition, measurement, treatment and disclosure in the financial statements. This provides a basis for numerous types of business or entities in the preparation of the financial statements providing a standardized way of presenting the entity's financial position and financial performance. Therefore, these standards are also a means of reducing or even eliminating the diverse practices of the generally followed accounting practices and thus enhancing the principles of transparency, consistency, comparability and reliability.

With a view of achieving these objectives, the International Accounting Standards Board (IASB) initiated efforts toward harmonization of the Accounting Standards and Accounting Practices across the international boundaries. This effort is directed towards making all the users and the stakeholders have a common understanding of the financial statements in all jurisdictions. Further, in the scenario of globalization, Nepal cannot isolate itself from the developments taking place worldwide and therefore guided by the aim of having its own standards in line with International Accounting Standards
